Unfortunately some of the issues are still at hand:

- SZMC – [“Port History timeout with exception #9531”](#) Created
on Thu, 24 May
 - TFS: 39909
 - Pending logs from customer
- Harel – [“Policy did not applied correctly #9311”](#) Created
on Tue, 24 Apr
 - TFS : 38814
 - Voice vlan - expected 3.2HF1
- ECP – [“Switch down and not recovered - only after re-added #9429”](#) Created
on Thu, 10 Ma
 - TFS: 40041
 - Pending session with customer

And some new CRUCIAL issues:

- ELAL – [“Service memory is above the allowed memory #9789”](#) Created
on Wed, 4 Jul
 - Looks like memory leak
 - After PS analysis and escalated to R&D
- SZMC – [“Patrol is executed while configured to NEVER #9721”](#)
 - TFS: 40741
 - Set with high priority to HF
